

Make a video or screen recording explaining your Tableau workbook.

You need to cover these four points in your video.

1. Please start the video by introducing yourself.

For example: **Hello, my name is Mohd Nadeem, I am a fourth-year student at STA engineering college. In this video, I will be explaining the tasks that I have performed as part of the Tableau project.**

2. Introduction to the problem statement
3. Your approach to solving the problem
4. Show all features of the visualizations, customizations done, filters applied etc.

Showing your face and audio is not mandatory. But, it is suggested that you include the audio, as it will assist you in explaining your work to viewers.

The following resources will assist you in making a video.

Different ways to record your screen:

1. Window inbuilt screen record.
